

STIR 30-HOUR OSHA TRAINING

Fall Protection (1 hours sessions)

This course is designed to inform employees about the requirements for lockout/tagout during servicing and maintenance of machines or equipment. Also covered are the requirements of the OSHA Lockout/Tagout Standard, procedures for the application of locks and tags, and a discussion of the types of energy these procedures are designed to control.

Machinery and Machine Guarding (1 hours sessions)

This course will help workers to protect themselves from moving machinery. After completion of this course, workers will be able to properly apply the OSHA Machine and Machine Guarding requirements to their day-to-day work activities.

Materials Handling for General Industry (1 hours sessions)

This course specifies the materials handling and storage procedures developed by the Occupational Safety and Health Administration (OSHA) to reduce injuries resulting from mishandling or improper storage.

Means of Egress and Fire Protection (1 hours sessions)

Every year thousands of people are injured or killed because of inappropriate exit routes. It is a harsh fact that inadequate egress provisions are usually more responsible for casualties and fatalities than the actual emergency. This course gives you a basic understanding of means of egress and fire protection methods. It is essential to know how we can save co-workers' lives as well as our own in the workplace.

Personal Protective Equipment (1 hours sessions)

This course will provide the employers and the employees with knowledge concerning the proper selection, care and use of personal protective equipment. They will be informed of the requirements for compliance with OSHA requirements.

OSHA Safety & Health Program (1 hours sessions)

This course is designed for employers, supervisors, and managers who need to thoroughly understand, implement, and communicate an OSHA program. Workers who need to be educated and aware of OSHA issues within their domain will also find this course useful. OSHA officers

and coordinators who need to develop an OSHA program and ensure conformance to the policies will see this course as a must.

Walking and Working Surfaces (1 hours sessions)

This course alerts participants to the hazards of walking and working surfaces and provides information about workplace action needed to eliminate or control these hazards.
